

Mobile View

Header/title disappears when you scroll down but reappears when you scroll back up (will be the title of the page not my name, I just drew it wrong)

Menu exists in hamburger format, opens up in a side view, where current page is indicated by color and alignment

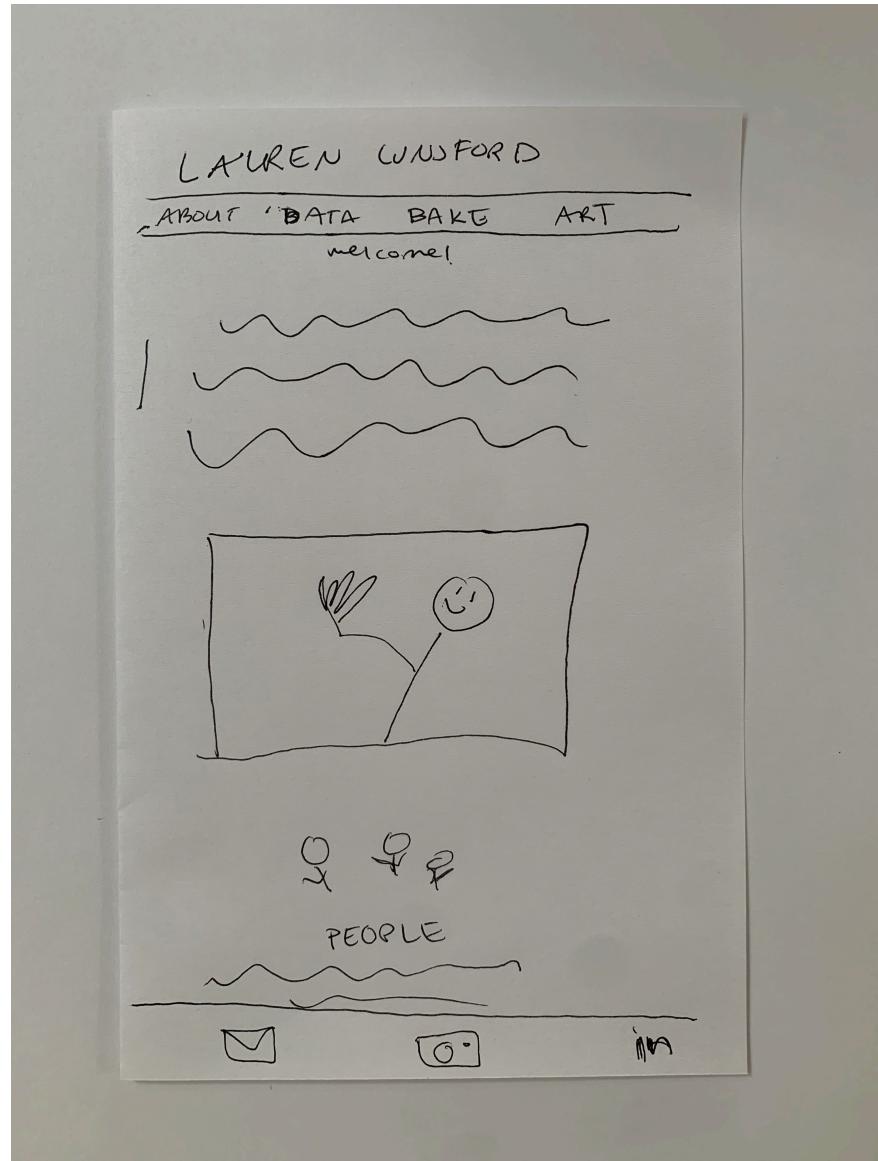

Consistent footer includes social icons linked to social sites

What I bake will utilize the Instagram api to stream in photos from my baking account

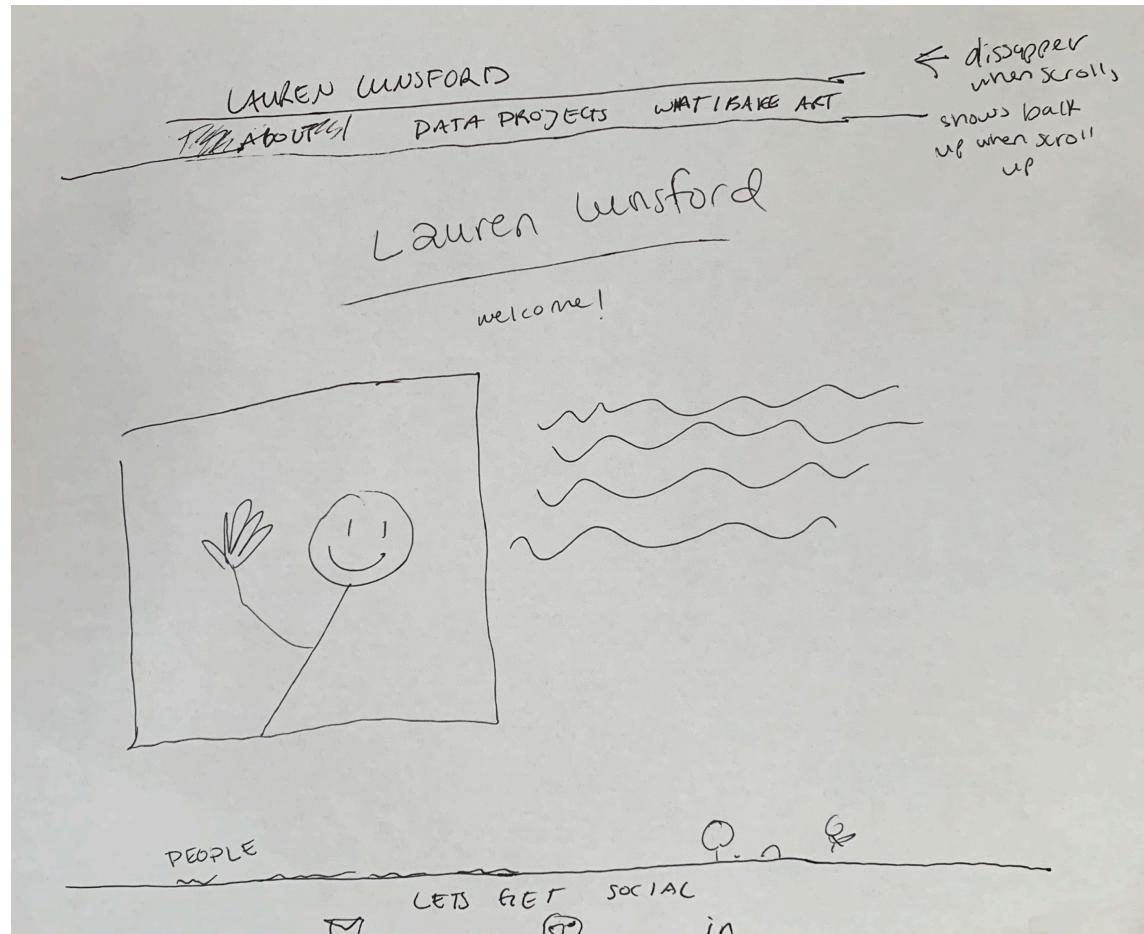

Art will utilize grid to display my art

Tablet View
